Learning made easy

Everyone can read and write with IntoWords Pro

- Get to grips with reading – even if you are dyslexic.
- Write better, with fewer mistakes.
- Gain self-confidence and a zest for learning.

IntoWords Pro

What is IntoWords Pro?

IntoWords Pro is Denmark's most acclaimed and widely used reading and writing support tool. With IntoWords Pro on your computer, you can read all the text in front of you online, in PDF files and Office programs. When you are writing, IntoWords Pro helps you by suggesting words.

Use IntoWords Pro as a personal tool to counter-balance reading and writing difficulties. Or as a teaching aid that helps everyone to read and write better. In other languages, too!

With IntoWords Pro, you can:

- read at an age-appropriate level in spite of your dyslexia
- write better and more correctly
- write in other languages and hear words pronounced with the proper accent
- convert text to MP3 files, which you can carry with you on a mobile player
- crack the reading code – write your way into reading.

IntoWords Pro has been constantly developed and improved over the past 25 years, and several research projects have demonstrated its ability to release new potential in people with reading and writing difficulties.

Eighty percent of all primary and lower secondary schools in Denmark already subscribe to IntoWords Pro for their pupils and teachers, and the program is included as compensatory aid in the government IT packages on youth education programmes.

List of features

- Read aloud function with various strategies and highlighting
- Context-based word suggestions
- Help with spelling
- Auto-suggestion of next word (word prediction)
- Generate own glossaries (extra vocabulary)
- Search for words using wildcards
- Word suggestions are displayed when the cursor is placed in a word (help with proofreading)
- Mark text and make audio files (MP3)
- Read aloud function in more than 40 languages (optional extra).

The IntoWords Pro toolbar is visible as a discreet bar that can be moved around the screen. Here it is located just above the text.

Read with relish and write with style

IntoWords Pro's reading and writing support frees up mental resources, allowing you to concentrate on what is important: the content of the text.

IntoWords Pro is visible as a discreet toolbar that can be located flexibly on the screen. The toolbar provides access to a number of personal setting options that make IntoWords Pro an extra effective compensatory reading and writing tool.

The read aloud function provides access to knowledge and community

Using IntoWords Pro's read aloud function, you can read your way to exactly the same knowledge as your peers or colleagues who have full reading ability. Select reading strategies based on the purpose of your reading, e.g. to read the entire text or just a few difficult words. Have words highlighted as they are read out, so you can stay focused on the text.

You can train yourself to hear up to 600 words per minute – giving you more time for other tasks.

Mobile reading

IntoWords Pro also gives you the unique option of saving texts as MP3 audio files, which you can listen to on your mobile player.

Word suggestion: Write texts with fewer mistakes

The word suggestions allow you to write even if you have difficulty spelling. You will be shown lists of words offering meaningful suggestions for words to continue your sentence or to complete the word you have begun. Get IntoWords Pro to read out your finished text so you can hear if you have made mistakes or if the language needs to be more concise.

SkaniRead: Makes texts accessible

Normally when hard copy is scanned, the text becomes a locked image. SkaniRead scans in such a way that each character can be recognised (OCR: 'Optical Character Recognition') and thus read out aloud and edited using IntoWords Pro.

Profiles

You can use IntoWords Pro's standard profiles and, for example, switch easily between languages. Or you can create your own reading and writing profiles, setting the reading speed, strategies, languages and voices to suit you.

Vocational glossaries and your own glossaries

You expand IntoWords Pro's vocabulary by adding specialist dictionaries, e.g. law, engineering science or health education, making the spelling of "diaphragm" and "relief valves" easy. You can also generate your own, topic-specific glossaries based on text

from the internet, for example, and obtain glossaries for topics such as Nordic history, the Harry Potter universe or space travel. At the top of the picture on the left is the general glossary and, at the bottom, the list of imported technical terms.

1	his
2	him
3	he
4	had
5	have
6	her
7	has
8	how
9	however
0	here
Alt+1	Hermione
Alt+2	Hogwarts
Alt+3	Hallows
Alt+4	
Alt+5	

See the word!

If you have difficulty seeing, you can wear glasses. If you have difficulty reading, you can use IntoWords Pro.

IntoWords Pro is your eyes when the text is a barrier. Perhaps you are a new reader who needs to link the characters of the letters to their sounds to become a proficient reader.

Maybe you need extra support for a while to crack the reading code, to read with sufficient speed or get what you are reading to make sense.

Or maybe you are dyslexic and need IntoWords Pro to help you obtain knowledge and to be able to participate on an equal footing with everyone else in the classroom, at work or in a social context.

When you see and hear the text through IntoWords Pro, you can actually learn exactly what your peers or colleagues who have full reading ability are learning.
